

Since November, 2012 until May, 2013 the special afternoon classes of sixth graders of "Ivan Vazov" Secondary School in Sopot with a teacher Zlatka Drunina are going to work on the project "Learning from Nature".

.

Its purpose is to "develop innovative approaches to sustainable development that could develop the capacity of schools and organizations working with young people to prepare them to take an active role in creating a green economy and society."

The education package was developed using some of the natural principles and characteristics.

Thi

s includes the following modules:

"

Waste is

equal to

food", "

Multiple benefits",

"Diversity

gives strength

".

Using

interactive teaching methods

, students

borrow

lessons

from nature,

share your thoughts

and

feel

inspired for their future.
