

It started the next part of the project "System of career guidance in school education" BG05M2 OP001-2.001

of Ministry of Education. It's with the financial support of Operational Programme "Science and education for smart growth", cofinanced by the European Union by EU structural and investment funds. The big aim of this project is to be created an integrated system for realization and employment qualification in secondary education, accordance with the requirements of the labor market.

The module "School - labor market" is created at the National Portal for career guidance. Its aim is to help employment and career development in secondary education. You will find descriptions and profiles of professions which will help you in choosing a school and a future profession.
